

Birds of a Feather Solitaire Card Game

Todd W. Neller

Examples of row and column stack flocking:

Same-rank column flocking:

Adjacent-rank column flocking:

Same-suit row flocking:

Can you find a sequence of row/column flockings in the puzzle to the left resulting in a single flock stack?

- **Materials:** a standard, shuffled 52-card deck
- **Setup:** Deal cards singly, face-up into a grid (e.g. 4-by-4).
- **Object:** Form a single stack of all cards.
- **Play:** A player may move (i.e. flock) one stack of cards onto another stack of cards in the *same row or column* if the cards on top of both stacks have either
 - (1) the *same suits*, or
 - (2) the *same or adjacent ranks*. Aces are low and not adjacent to kings, so rank adjacency is according to the ordering A, 2, 3, ..., J, Q, K.
